Jumawan, Jayrico
Simolata, Shekinah Glory G.
Soliven, Denzil Karl
Yuson, Mark Luis F.

Strengths	Weaknesses
- **Efficiency:** The web-based document payroll system enhances efficiency by automating payroll processes, reducing manual errors, and saving time for both barangay officials and residents.	- **Initial Implementation Challenges:** Transitioning to a web-based system may face resistance or technical challenges during the initial implementation phase, requiring adequate training and support for users.
- **Accountability:** The system fosters a more accountable local governance by providing transparent and trackable payroll records, enhancing trust between the community members and barangay officials.	- **Digital Divide:** Not all residents may have access to the internet or possess the necessary digital literacy skills to fully utilize the system, potentially widening the digital divide within the community.
- **Compliance:** Automated payroll calculations ensure compliance with regulatory requirements, including accurate tax records and employee documentation generation.	- **Data Security Concerns:** Storing sensitive payroll information online raises concerns about data security and privacy breaches.
	- **Dependency on Technology:** Reliance on technology leaves the system vulnerable to technical glitches, server downtime, or software updates, which could hamper the payroll processing and service delivery.

Opportunities	Threats
- **Scalability:** The web-based system can be scaled up to accommodate future growth and additional functionalities, such as integrating other barangay services or expanding accessibility features. - **Continuous Improvement:** Regular feedback and evaluation can drive continuous improvement of the system as they system will continuously provide what the user needs.	- **Cybersecurity Risks:** The system faces threats from cyberattacks, data breaches, or hacking attempts, making the integrity and confidentiality of the payroll system compromised. - **Legal and Regulatory Changes:** Changes in laws or regulations governing payroll processing, tax reporting, or data privacy would require updates on the payroll system.
